PROFILE

Technical profile with 3 years of independent hands-on experience operating production web applications, integrations and automation systems. Practical experience in incident troubleshooting, REST API integration, PostgreSQL/SQL, Linux/Docker, monitoring, technical documentation, functional testing and rollback-enabled deployments. Builds and operates JobViseur, a live React/Supabase/Stripe/n8n SaaS. Accounting and management background with SAP/Oracle exposure at Orange SA. Targeting application support, integration and technical operations roles in Geneva/Lausanne.

KEY SKILLS

Support & incidents	Application support, diagnostics, log analysis, incident handling, troubleshooting, monitoring, technical documentation
Integration & APIs	REST APIs, webhooks, JSON/schema mapping, normalization, deduplication, retries, rate limiting, idempotent ingestion
Data	PostgreSQL, Supabase, SQL, ingestion pipelines, migrations, data-quality checks
Systems & QA	Linux, Docker, Git/GitHub, scripted deployment, health checks, smoke/regression testing, production canaries, rollback
Analysis & testing	Requirements/process analysis, functional testing, QA, reporting, operating procedures
Automation & Web	n8n, React 18, JavaScript, Vite, Tailwind, Stripe, WordPress/WooCommerce
Languages	French native, English fluent (4 years in Australia), Spanish intermediate, Chinese beginner

PROFESSIONAL EXPERIENCE

Independent developer - applications, integration & operations | France | 2023 - present

- Builds and operates JobViseur, a production SaaS using React/Vite, Supabase/PostgreSQL, Stripe and self-hosted n8n orchestration.
- Integrates multi-source REST APIs: schema mapping, normalization, deduplication, rate limiting, retries and controlled PostgreSQL ingestion.
- Troubleshoots incidents and operates Linux/Docker services using logs, monitoring, health checks, alerting, scripted deployment (build, smoke test, rollback) and canaries.
- Documents procedures, translates requirements into functional rules, runs smoke/regression tests and performs data-quality checks.
- Retrieval: hybrid lexical + E5-embedding ranking benchmarked offline on 82 real job ads; not deployed to production.

E-commerce & web projects | France / remote | 2023 - present

- Operates WordPress/WooCommerce and React/Next.js environments covering hosting, payments, analytics, migrations, backups and performance.
- Administers domain and email infrastructure: DNS, SPF/DKIM/DMARC, transactional email and provider migrations.

Operational roles | Australia | 2019 - 2023

- Events, music production and support for construction-site teams in an English-speaking environment.

Accounting & administration assistant - Autogrill | Marseille | Jan - Jun 2019

- General accounting, administrative follow-up, reporting and compliance controls.

Accounts Payable internship - Orange SA | Marseille | 3 months, 2015

- Supplier-accounting workflows with hands-on exposure to SAP and Oracle environments.

EDUCATION

BTS Accounting & Management - obtained · Lycée Marie Curie, Marseille · 2014-2016 · Partial DCG, 2016-2018
